eSIM ?

eSIM has essentially the same information as a regular SIM,
Software on digital modules instead of physical chips.

Apple has already applied it to Apple Watch and iPad products.

Many mobiles will apply eSIM in the future

What is Bouygues Core

Bouygues Core is prepaid eSIM Smart Contract based on Blockchain service between MNOs(Mobile Network Operator)

Bouygues

Benefit Bouygues Core

- ◆ User can share or exchange their data with others.
- ◆ Customer can choice flexible and lucrative MNO.
- ◆ We will develop a smart contract based on our chain.
And anyone who has our coin or masternode can get some rewards for contributing to the revitalization of the chain

Future Of Bouygues Core

More Partners MNO, MVNO
Partner MNO, MVNO Provider
Increasing

To be Standard for eSim Sharing
Service
ESim will become a standard for
sharing services
